EDUCATION

National University of Singapore 2026 – 2030 (Expected)
Bachelor of Computing in Computer Science

Temasek Polytechnic 2021 – 2024
Diploma in Information Technology GPA: 3.86
- Eleven distinctions; Director's List, Year 1 (top 10% of cohort)

EXPERIENCE

GovTech Singapore Apr 2023 – May 2024
Software Engineering Intern Singapore
- Proposed and built 7Patches, a request-and-review workflow for database patches and queries with approvals, execution logs and an audit trail, refined through repeated stakeholder demos.
- Delivered 7Patches as the primary developer on a team of seven interns; it doubled as my polytechnic Major Project, earning a Distinction and the DBS Bank Project Prize.
- Reverse-engineered MOM dashboard reports into SQL against a legacy database, validating results with ministry users.
- Prototyped a RAG assistant over MOM safety and licensing documents in a new AI team, tuning prompts and chaining models to cross-check answers and cut hallucinations.
- **Technologies:** SQL, Next.js, Prisma, AWS Lambda, GitHub Actions, Figma

Singapore Police Force 2024 – 2026
Ground Response Force Officer (Full-time National Service) Airport Police Division

PROJECTS

AnimeKaiser 2026
Self-hosted anime tracker | Website | GitHub Bun, Effect, TanStack Start, Drizzle, PostgreSQL, Redis
- Built a self-hosted anime tracker that keeps AniList and MyAnimeList in sync, queuing every change so failed syncs are shown and retryable instead of silently lost.

CloudSync 2026
Self-hosted, Google Drive-style personal archive | GitHub Cloudflare Workers, AWS, Terraform, Electron
- Built a Mac app that uploads anything dropped into a folder, deleting the local copy only after the cloud copy is verified to prevent data loss during transfer.
- Built the web app to browse, search, preview and download photos, videos and documents, with every file kept private and never publicly accessible.

NUS Course Planner 2026
Agent-driven Canvas-to-Notion planner | GitHub TypeScript, Bun, SQLite, Codex, Notion API, Docker
- Built an AI agent that turns NUS Canvas coursework into a Notion task board, validating proposed changes before updating the planner.

drizzle-cuid2 2024
Open-source npm package | npm | GitHub TypeScript, Drizzle ORM
- Typed CUID2 column builders for PostgreSQL, MySQL and SQLite; 10k+ weekly npm downloads.

CO-CURRICULAR ACTIVITIES

Clynk Nov 2023 – May 2024
Co-founder & Software Engineer Student startup
- Built an NFC business card web app with switchable profiles in a team of five; owned cross-subdomain sign-in and onboarding through card activation.
- Piloted the working product at Temasek Polytechnic Open House 2024, with 200+ visitor interactions.

ACHIEVEMENTS

WorldSkills Singapore - National Bronze Medallist, Mobile Applications Development 2023
iNTUition v9.0 - Best Pre-University Hack for EmailGPT 2023
