

Noorullah Nasrullah

Software Engineer - Singapore

nasrullah01n@gmail.com | nasnoor.dev | github.com/Coeeter | linkedin.com/in/noorullah-nasrullah

NUS Computer Science undergraduate with 14 months of software engineering experience at GovTech Singapore. Pragmatic generalist who chooses tools to fit the problem, with experience across production government systems, retrieval-augmented AI and open-source developer tooling.

SOFTWARE EXPERIENCE

Software Engineering Intern at GovTech Singapore

Apr 2023 - May 2024

- Translated MOM user requirements and legacy iOSH workflows into business process models and Figma prototypes for iOSH 2.0 licensing modules; conducted UAT before rollout and reported defects to vendors.
- Reverse-engineered iOSH data sources and migrated MOM Insight dashboard logic into SQL queries during a database decommissioning, validating reports against production data with ministry users.
- Joined a newly formed AI team during an internship extension to evaluate an internal retrieval-augmented assistant for MOM; curated ministry documents, laws and rules, evaluated prompting strategies and tested for hallucinated answers.
- Proposed 7Patches and served as primary developer on a team of seven interns, designing a request-and-review prototype through repeated stakeholder demos from November to February around an error-prone database patch and query process, with approvals, execution logs and a searchable audit trail; earned a Distinction as a Temasek Polytechnic Major Project.

SELECTED PROJECTS

AnimeKaiser

2026

Full-stack, self-hosted anime tracker with two-way synchronisation across AniList and MyAnimeList. Bun, Effect, TanStack Start, Drizzle, PostgreSQL.

- Persisted outbound changes as queued database events with visible failure states and user-triggered retries; used PostgreSQL LISTEN/NOTIFY to wake workers without a separate queue service.
- Designed and built the responsive interface for discovery, library management, playback and sync recovery; cached AniList and Jikan data in Redis with provider fallbacks.

drizzle-cuid2

2024

Small TypeScript utility providing CUID2 column helpers for Drizzle ORM across PostgreSQL, MySQL and SQLite; published on npm, 2k+ weekly downloads.

ClickToEat

2022 - 2023

Restaurant review platform developed across web, API, Android and Flutter coursework. Kotlin, Jetpack Compose, Hilt, Google Maps SDK.

- Built the Android client as a multi-module application with 78 unit and instrumented test cases across JUnit, Compose Test and UI Automator.

EDUCATION AND SERVICE

National University of Singapore

2026 - 2030 (expected)

Bachelor of Computing in Computer Science

Ground Response Force Officer at Singapore Police Force

2024 - 2026

Full-time National Service, Airport Police Division

Temasek Polytechnic

2021 - 2024

Diploma in Information Technology - GPA 3.86

Eleven distinctions; Director's List, Year 1 (top 10% of cohort).

SELECTED AWARDS

DBS Bank Project Prize

2024

7Patches selected among the cohort's top three Major Projects

WorldSkills Singapore - National Bronze Medallist

2023

Placed third in Mobile Applications Development

iNTUition v9.0 - Best Pre-University Hack

2023

EmailGPT, a Gmail extension for drafting replies directly in the composer

SKILLS

Languages - TypeScript, Go, Kotlin, Python, Java

Frameworks/Tools - React, Effect, TanStack Start, Drizzle

Technologies - Node.js, Bun, PostgreSQL, Docker, Cloudflare Workers, AWS
