EDUCATION

National University of Singapore 2026 - 2030 (Expected)
Bachelor of Computing in Computer Science

Temasek Polytechnic 2021 - 2024
Diploma in Information Technology GPA: 3.86
- Eleven distinctions; Director's List, Year 1 (top 10% of cohort)

EXPERIENCE

GovTech Singapore Apr 2023 - May 2024
Software Engineering Intern Singapore
- Translated MOM user requirements and legacy iOSH workflows into business process models and Figma prototypes for iOSH 2.0 licensing modules; conducted UAT before rollout and reported defects to vendors.
- Reverse-engineered iOSH data sources and migrated MOM Insight dashboard logic into SQL queries during a database decommissioning, validating reports against production data with ministry users.
- Joined a newly formed AI team during an internship extension to evaluate an internal retrieval-augmented assistant for MOM; curated ministry documents, laws and rules, evaluated prompting strategies and tested for hallucinated answers.
- Proposed 7Patches and served as primary developer on a team of seven interns, designing a request-and-review prototype through repeated stakeholder demos around an error-prone database patch and query process, with approvals, execution logs and a searchable audit trail; earned a Distinction as a Temasek Polytechnic Major Project.

Singapore Police Force 2024 - 2026
Ground Response Force Officer (Full-time National Service) Airport Police Division

PROJECTS

AnimeKaiser 2026
Self-hosted anime tracker | Website | GitHub Bun, Effect, TanStack Start, Drizzle, PostgreSQL, Redis
- Designed and built a full-stack anime tracker end to end, with two-way library synchronisation across AniList and MyAnimeList.
- Persisted outbound changes as queued database events with visible failure states and user-triggered retries; used PostgreSQL `LISTEN/NOTIFY` to wake workers without a separate queue service.
- Built the responsive interface for discovery, library management, playback and sync recovery; cached AniList and Jikan data in Redis with provider fallbacks.

drizzle-cuid2 2024
Open-source npm package | npm | GitHub TypeScript, Drizzle ORM
- Published typed CUID2 column builders for Drizzle ORM across PostgreSQL, MySQL and SQLite, preserving Drizzle's fluent column API; 2k+ weekly downloads.

ClickToEat 2022 - 2023
Restaurant review platform | GitHub Kotlin, Jetpack Compose, Hilt, Google Maps SDK
- Built the same product across web, API, Android and Flutter coursework to compare stacks; the Android client is a multi-module app with 78 unit and instrumented test cases across JUnit, Compose Test and UI Automator.

ACHIEVEMENTS

DBS Bank Project Prize - 7Patches selected among the cohort's top three Major Projects 2024
WorldSkills Singapore - National Bronze Medallist, Mobile Applications Development 2023
iNTUition v9.0 - Best Pre-University Hack for EmailGPT 2023

SKILLS

- **Languages:** TypeScript, Go, Kotlin, Python, Java, SQL
- **Frameworks:** React, Effect, TanStack Start, Drizzle, Jetpack Compose, Flutter
- **Infrastructure:** Node.js, Bun, PostgreSQL, Redis, Docker, Cloudflare Workers, AWS
